

STUD-E™

Laboratory Safety Survey Fact Sheet

Prioritize critical safety issues while balancing the bottom line

STUD-E Survey Purpose

Assess risks that injure workers, damage businesses, or impact the environment.

Safety Goals

- Address workplace challenges
- Address existing problem areas
- Determine corrective actions

Survey Length

- 2-4 hours

Common Hazards

to Look For

- Unapproved modifications
- Non-functioning/broken safety equipment
- Rust/corrosion
- Open containers
- Standing workers
- Lack of communication

Expected Outcomes

- Provide report to demonstrate our safety solutions
- Identify top 3-5 safety issues to resolve immediately
- Define all involved in the decision-making process
- Schedule follow up call in 2 weeks
- Implementation of safety solutions in 2-4 weeks is ideal
