Bullard Hard Hat Assessment

Reinforce your organization's safety program and help reduce serious injuries with the Bullard hard hat assessment program. Trained professionals will evaluate your workplace and make recommendations for appropriate employee head protection.

About

Trained Bullard personnel will tour your facility and discuss applicable standards and hard hat classifications based on employee job responsibilities and associated hazards. Typical discussion topics include Type 1 and Type 2 hard hats, climbing style helmets, as well as electrical and impact protection standards.

Samples will also be made available so that you can see the differences between four- and six-point suspensions, standard and classic style hard hats, as well as patented AboveView™ hard hats. Bullard will assist you in making the best selection for your facility and employees.

Key Benefits

Bullard's hard hat assessment program features:

- A QSSP-certified Bullard representative will conduct each assessment
- Assessments are fully customized to your needs and requirements
- Bullard professionals will assist you and your organization in maintaining compliance
- Bullard professionals will provide head protection samples for evaluation
- Literature and training support are available through your Bullard representative
