

	Process/Room	Benefits of Metro	Metro Products	Why Metro?
 Gowning	Before entering a cannabis grow facility it is important to prevent contamination of the facility by bacteria, fungus, and mold by changing into sterile clothing in a gowning room. Utilizing clothing such as face masks, hair nets, gloves, and coveralls help to protect a facility, and maintain a controlled environment.	<ul style="list-style-type: none"> • High quality products that help create and protect a sterile environment. • Cleanable, corrosion resistant solutions protects facilities from contamination. • Made of 304 Stainless Steel for easy cleanability, and a product that will last 	<ul style="list-style-type: none"> • Gowning Bench • Gowning Rack • Stainless worktables 	Metro has helped some of the top labs in the world layout their gowning rooms. Creating a sterile cannabis growing environment is something that Metro understands.
 Cloning	The propagation of new plants in your operation are done in a cloning room. Clippings, or cultures of plant matter are placed under lighting systems on sterile shelves to begin the rooting process. Once plants have rooted and begin to grow they will be moved to a Vegetative room to grow to their full potential.	<ul style="list-style-type: none"> • Adjustable shelving helps meet ideal light spacing. • Highly customizable to meet your room's dimensions. • High density track shelving helps find more space for clones. • Cleanable shelving protects against mold, fungus, and Bacteria. 	<ul style="list-style-type: none"> • MetroMax Shelving • Top Track Systems • Stainless Steel Tables • Dunnage racks 	Metro brings solutions that are easily cleanable and provide high density products that help grow more healthy clones in a smaller footprint without sacrificing accessibility of clones.
 Vegetative & Flowering	Plants are grown to full potential then moved into a flowering room to begin the transition into the flowering stage. This is achieved by simulating Fall which helps the plants begin budding. High density of plants along with the need for healthy airflow is crucial for a successful grow.	<ul style="list-style-type: none"> • Easy transport of plants from room to room • Quality sturdy products that protect high quality products and harvest • Cleanable & corrosion resistant (Microban) that stops the growth of organic contaminants 	<ul style="list-style-type: none"> • Mobile Wire Carts • MetroMax Carts • Dunnage 	Transport of high value product is something that metro has done time and again. Sturdy and cleanable dollies, Carts and Mobile units will help transport your plants along your process safely.
 Drying	In a temperature controlled room plants are either hung by their stems or trimmed and placed to dry on trays. Humidity, temperature, and cleanliness are essential to creating a quality product. Here is where there can be a high risk of contamination due to improper cleaning of equipment, and high levels of moisture.	<ul style="list-style-type: none"> • Mobile drying racks allow easy access and transport of product to final processing areas • Corrosion resistant solutions protect from oxidization of racking and other surfaces • Convertible solutions allow for tray drying or hang drying processes and help match internal process. 	<ul style="list-style-type: none"> • Drying Rack • Top Track Systems • Carts • SmartWall 	Metro's drying solutions have been designed in partnership with some of the largest cannabis growers in the world. Our solution creates maximum airflow for hung plants and allows for maximum efficient density.
 Trimming & Packaging	Workers skillfully trim dried buds to have an aesthetically pleasing look while also creating a more potent & easy smoking product, ultimately increasing the value of the cannabis.	<ul style="list-style-type: none"> • Higher efficiency in the trimming process • Ergonomic workstations help to keep employees comfortable and productive • Increased productivity of processes and workers leads to higher quality and production 	<ul style="list-style-type: none"> • Prepmate • Stainless Steel Worktables • Carts 	Trimming is one of the most demanding jobs in the cannabis industry and creating an ergonomic solution for trimmers is what we set out to do. Effective and efficient, Metro's trimming solutions help increase the productivity of your trimmers while increasing your production.
 Store & Secure	Securing final product during the curing process or securely storing cannabis that is ready to be sold is important in any operation. High value products are often the target of pilferage, and protecting your crop is important.	<ul style="list-style-type: none"> • Heavy duty security that helps protect valuable items. • Cleanable, corrosion resistant solutions protects facilities from contamination • Visibly see that valuables are protected in either our SES or MAX security cages 	<ul style="list-style-type: none"> • SES Security • Max Security • Top Track 	Protecting high value product is what our security cages were designed to do. Not only are they protected, but you can SEE they are protected.
