NEW
Laboratory
Equipment
Products

pH Meters
Accurate pH measurement
in the lab or in the field

Vortex Mixers
Continuous or touch modes, variable or fixed
speed, available in analog or digital models

Homogenizers
High throughput grinding for processing
multiple tubes, microplates, deep-well plates.

Centrifuges
High-speed operation, intuitive interface,
and compact design

Hotplates / Stirrers
Compact, reliable, easy-to-use (and clean!)
for basic heating and stirring

**Incubating &
Incubating Cooling Shakers**
Save bench space with combined incubating/
cooling, and shaking features

Open Air Shakers
Triple eccentric drive provides a smooth,
stable shaking motion throughout the
entire speed range

Semi-Micro & Analytical Balances
Balances with a readabilities of 0.01 to 0.1 mg
and capacities up to 320g

Precision Balances
Balances with a readabilities of 0.1mg to 0.1g
and capacities up to 35 kg

**Point of Sale Balances
(Type Approved)**
NTEP and Measurement Canada Approved
balances for legal-for-trade applications

Moisture Analyzers
Quickly determine the moisture content
of a wide variety of samples

Bench Scales
Fast, accurate, and durable scales for
weighing applications

Floor Scales
Rugged, industrial strength platforms with
capacities up to 10,000 lb / 4500 kg

Checkweighers
Fast, accurate checkweighing, stainless steel
construction, and NSF-certified USDA accepted
food-safe

OHAUS® Products for all areas and applications in your

BOTANICALS WORKFLOW

From Start to Finish

Accurate measurement is critical throughout your entire production. You need results that you can trust—you can't afford any errors. OHAUS provides accurate, reliable, and affordable equipment to help grow your profits. See how OHAUS products have a place in every stage of your workflow.

CULTIVATION

Growing & Harvesting

Bulk Packaging

Pre-Packaging & Direct Sale

Cultivation sites are where cannabis plants are grown and harvested. Light, water, and nutrients are critical to maintaining healthy plants. Mature plants are harvested; stalks, leaves, and flower are measured, tracked, and packaged for resale or sent for further processing.

Bench Scales

Laboratory Instruments

Floor Scales

Type-Approved Balances

Checkweighers

TESTING AND R&D

Analytical Sample Prep

Research, Development & Testing

Testing labs determine potency and test for cannabinoids, terpenes, solvents, pesticides, etc. Research labs explore the plant's medicinal properties and effects as well as develop new methods for growing, strains, products, and delivery methods.

PROCESSING

Production

Bulk Packaging

Pre-Packaging & Direct Sale

Processing facilities are where harvested cannabis plant materials are turned into other products for sale. Oils and terpenes are extracted and packaged for resale or used in other consumable products such as infused products or edibles.

DISPENSARY & POS

Pre-Packaging & Direct Sale

Dispensaries are where various cannabis products, such as flower for smoke, vape oils, infused products, or edibles are sold to customers. Product may be supplied in pre-packaged ready for sale form or in bulk to be dispensed at the point of sale.
