Enhance workflow efficiency for smarter, value-driven performance

Get reliable, equivalent results with Sera-Mag™ Select magnetic beads

Sera-Mag Select magnetic beads

Sera-Mag™ Select magnetic beads provide cost effective magnetic bead separation technology for molecular biology applications, nucleic acid isolation, and research immunoassays.

Sera-Mag super-paramagnetic particles combine a fast magnetic response time with a high binding capacity. The particles feature a large surface area, high sensitivity, physical stability, and fast reaction kinetics.

All Sera-Mag particles provide a very slow settling rate in the absence of a magnetic field. The particles are not affected by sonication, drying, or pH extremes.

Ordering information

PCR clean up and size selection reagents	Quantity/pack	Product code
Sera-Mag Select, 5 mL	1	09-928-106
Sera-Mag Select, 60 mL	1	09-928-107
Sera-Mag Select, 450 mL	1	09-928-108
Sera-Mag carboxylate modified [E7] Magnetic beads, hydrophilic,15 mL	1	09-981-115
MagRack™ 6	1	45-002-170
